## LEONSEGS

LARGE EARTH OBSERVATION  
NEW SPACE ECOSYSTEM  
GROUND SEGMENT

LEONSEGS, a project co-funded by the European Commission under the Horizon Europe programme, stands for Large Earth Observation New Space Ecosystem Ground Segment. It is a federated environment of Earth Observation (EO) data providers that collaborate all together through harmonized interfaces and that are managed by a central automated multi-mission service, able to coordinate and produce for the End-User complex EO product.

LARGE EARTH OBSERVATION  
NEW SPACE ECOSYSTEM  
GROUND SEGMENT

*"In LEONSEGS, we will test and improve our method in a real-world setting, using different types of satellite imagery and showing its potential in prototype applications. We are excited to be part of this project that combines ground segment as a service with scientific innovation".*

What is LEONSEGS?

Revolutionising the future of the Earth  
Observation data business landscape

A 30-month project that started in July 2023, with the goal to develop a prototype of a multi-mission ground segment that can coordinate and produce complex EO products for end users, by federating different EO data providers that support the heterogeneity and diversity of the New Space ecosystem.

By joining LEONSEGS, you will:

- **Access and use EO data from multiple sources and missions**, through harmonized interfaces and the central automated service
- **Externalize your ground segment infrastructure** or **access new markets**, if you are an EO data provider
- **Contribute to European EO leadership and innovation**, with disruptive solutions for complex scenarios of multiple collaborative missions
- **Collaborate with other EO stakeholders**, such as private sector, EU policymakers and end users
